

II. ENER-MAR- CORP-COMM

Current Issues in Energy Law

CURRENT ISSUES

in Energy Law

There are three good reasons why to attend the Conference:

- 1) The 4th energy legislation package proposal amounts to over 3000 pages
- 2) There are numerous issues in the Croatian energy market and domestic energy regulation
- 3) The last year's audience is now participating as speakers

Our aim is to bring together the experts from the versatile energy field, and foster a continuing dialogue in the energy law related issues.

The topics are mainly chosen by the practitioners whose aim is to present the issues that they are faced with in their daily operations.

We hope that you will join us in the discussions!
